

Tackling the Thorny Issue of Spillway Capacity in Yorkshire

J. N. BOOTH, Yorkshire Water, Bradford, UK

J. L. DEUCHAR, Yorkshire Water, Bradford, UK

A. K. HUGHES, Atkins, Epsom, UK

SYNOPSIS. This paper will illustrate by example a number of cases where the problem of insufficient spillway capacity has been dealt with in ways other than just increasing the size of spillway channels. It will also illustrate the benefits of physical modelling and a number of problems associated with the environment and planning restrictions.
