

The banner features a dark blue background on the left with white and light blue text. On the right, there is a lighter blue background with three circular logos (EEM6 GCOLD, a map of Europe, and CIGB ICOLD) and the website address www.eurcold2019.com. Below the logos is a photograph of a coastal town with a stone pier extending into the water.

11th ICOLD
European Club Symposium

2-4 October 2019
Minoan Palace, Chania
Crete - Greece

EEM6 GCOLD CIGB ICOLD
www.eurcold2019.com

The Greek Committee on Large Dams (GCOLD) invites you to participate in the **11th ICOLD European Club Symposium** on the island of **Crete, Greece**. The Symposium will be held from the **2nd to the 4th of October 2019 at Chania**, Western Crete.

The island of Crete, situated between the Aegean and the Libyan Sea, has been a cross road of ancient civilizations. This has left a rich inheritance of ancient monuments and artefacts of unparalleled beauty. Modern Crete, one of the wealthiest parts of Greece, has built a number of large dams for irrigation, water supply, flood protection and hydro power. Having a substantial infrastructure for conferences and a magnificent natural coastal and mountainous environment, it is an ideal place to combine a successful EuroCOLD Symposium with field trips and recreational activities. Crete in October is warm enough for enjoying the outdoors and the beaches.

The Symposium is expected to have a vivid technical program, combined with a seminar for young Engineers. More on the program will be announced soon. Please save the date and we expect to see you in Greece in October 2019.
