
BDS 15th SUPERVISING ENGINEERS' FORUM

Thursday 16th September 2021

University of Nottingham*

The BDS 15th Supervising Engineers' Forum is to take place on Thursday 16th September 2021. *Whilst actual arrangements are yet to be confirmed – whether in person at the University of Nottingham or online or both – the forum will take place. Until there is clarity from the government and the University of Nottingham, the actual format of the forum cannot be decided. Whilst it is hoped to have an in-person event, it may be necessary to provide for remote sessions. Confirmation of format will be provided as soon as possible.

A "Call for Presentations" has been made by the BDS with a closing date for the submission of synopses being Friday 9th July 2021. The presentation sessions will be followed by an open forum discussion. Depending on the final format of the forum, presentations will either be presented live or be pre-recorded.

The Forum should be of great interest to Supervising Engineers, other Panel Engineers Undertakers and all those involved in dam safety together with trainee Supervising Engineers and students.

Registration will open in **August 2021**. Bookings will be accepted until **Wednesday 1st September 2021**.

Further information regarding the forum and registration requirements will be provided on the BDS website (<http://www.britishdams.org/>).
